The International Social Survey Programme *

by Tom W. Smith, National Opinion Research Center,
University of Chicago

The International Social Survey Programme (ISSP) is a continuing annual programme of crossnational collaboration. It brings together pre-existing social science projects and coordinates research goals, thereby adding a crossnational perspective to the individual national studies.

ISSP evolved from a bilateral collaboration between the Allgemeinen Bevölkerungsumfragen der Sozialwissenschaften (ALLBUS) of the Zentrum für Umfragen, Methoden und Analysen in Mannheim, West Germany, and the General Social Survey (GSS) of the National Opinion Research Center (NORC), University of Chicago. Both the ALLBUS and the GSS are replicating time series studies. The ALLBUS has been conducted biennially since 1980 and the GSS annually (except for 1979 and 1981) since 1972. In 1982 ZUMA and the NORC devoted a small segment of the ALLBUS and GSS to a common set of questions on job values, important areas of life, abortion, and feminism. (A merged data set is available from the Interuniversity Consortium for Political and Social Research - ICPSR, University of Michigan.) Again in 1984 collaboration was carried out, this time on class differences, equality, and the welfare state.

Meanwhile, in late 1983 Social and Community Planning Research (SCPR), London, which was starting a social indicators series called the British Social Attitudes Survey (BSA), similar to the ALLBUS and GSS, secured funds from the Nuffield Foundation to hold meetings to further international collaboration. Representatives from ZUMA, NORC, SCPR, and the Research School of Social Sciences, Australian National University, organized ISSP in 1984 and agreed to (1) jointly develop topical modules dealing with important areas of social science, (2) field the modules as a fifteen-minute supplement to the regular national surveys (or a special survey if necessary), (3) include an extensive common core of background variables, and (4) make the data available to the social science community as soon as possible.

Each research organization funds all of its own costs. There are no central funds. The merging of the data into a crossnational data set is performed by the Zentralarchiv für Empirische Sozialforschung, University of Cologne, Germany.

Since 1984, ISSP has grown to 21 nations: the founding four - Germany, the United States, Great Britain, and Australia - plus Austria, Bulgaria, Canada, Czechoslovakia, Hungary, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, the Philippines, Poland, Russia, Slovenia and Sweden. In addition, East Germany was added to the German sample upon reunification. The affiliated organizations are listed in Table 1. Several other countries have replicated particular modules (eg. Switzerland).

The annual topics for ISSP are developed over several years by a sub-committee and are pretested in various countries. The annual plenary meeting of ISSP then adopts the final questionnaire. The ISSP researchers especially concentrate on developing questions that are (1) meaningful and relevant to all countries and (2) can be expressed in an equivalent manner in all relevant languages. The questionnaire is originally drafted in British English and then translated to other languages using standard back translation procedures.

The themes covered in the ISSP module and the nations collecting data are listed in Table 1. The first theme on the role of government covered attitudes towards civil liberties, education and parenting, welfare and social equality, and the economy. The second theme was on social networks and support systems. It contained detailed behavioral reports on contacts with various friends and relatives and then a series of questions about where one

*) This is an updated version of T. Smith's 1991 description.

would turn for help when faced with various situations such as financial need, minor illness, career advice, and emotional distress. The third module, on social equality, concerned beliefs about what factors effect one's chances for social mobility (e.g. parental status, education, contacts, race, etc.), explanations for inequality, assessments of social conflicts, and related questions. It also asked people to estimate the average earnings of various occupations (e.g. farm laborer and doctor) and what the average earnings of these occupations should be. The fourth module covered the impact on the family of the changing labor force participation of women. It included attitudes on marriage and cohabitation, divorce, children, and child care and special demographics on labor force status, child care, and earnings of husband and wife. The fifth module on orientations towards work dealt with motivations to work, desired characteristics of a job, problems relating to unemployment, satisfaction with one's own job (if employed), and working conditions (if employed).

The sixth module in 1990 repeats the role of government theme. By replicating substantial parts of earlier modules, ISSP not only has a crossnational perspective, but also an over time perspective. We will be able to compare nations and test whether similar social science models operate across societies, and see if there are similar international trends and parallel models of social change operating across nations. The seventh module covers the impact of religious beliefs and behaviors on social, political, and moral attitudes. It includes questions on religious upbringing, current religious activities, traditional Christian beliefs, and existential beliefs. The non-religious items concern such topics as personal morality, sex roles, crime and punishment, and abortion. The eighth module in 1992 replicates and extends the 1987 social equality module. The ninth module in 1993 covers attitudes to the environment, nature, and environmental pollution and includes some behaviour and efficacy questions and a knowledge quiz. A module on ethnic conflict and intergroup relations is under design.

ISSP marks several new departures in the area of crossnational research. First, the collaboration between organizations is not special or intermittent, but routine and continual. Second, while necessarily more circumscribed than collaboration dedicated solely to cross-national research on a single topic, ISSP makes crossnational research a basic part of the national research agenda of each participating country. Third, by combining a cross time with a crossnational perspective, two powerful research designs are being used to study societal processes.

Data from the first five modules on role of government, social networks and support systems, social equality, the family, and work orientation and the replication of the role of government from 1990 are presently available from the Zentralarchiv and various national archives such as Essex in Britain and ICPSR in the United States. The other modules will be released periodically.

Publications based on the ISSP are listed in a bibliography available from the Secretariat. Two collections of ISSP research are (1) Roger Jowell, Sharon Witherspoon, and Lindsay Brook, eds., *British Social Attitudes: Special International Report* (Aldershot: Gower; 1989), and (2) J.W. Becker, James A. Davis, Peter Ester, and Peter Ph. Mohler, eds., *Attitudes to Inequality and the Role of Government* (Rijswijk, The Netherlands: Sociaal en Cultureel Planbureau, 1990).

For further details contact the ISSP Secretariat, Secretary Peter Ph. Mohler, ZUMA, B2, 1, P.O.Box 122155, D-6800 Mannheim, Germany. Telephone No.:0621/180040, Fax No.: 0621/1800449.

Short Description of the ISSP Modules

- 1985 **Role of Government I**
 Attitudes toward the government plus general political attitudes
- 1986 **Social Networks**
 Ego-centred network survey in the Claude Fisher tradition ("to whom would you turn") plus a series of questions concerning the structure and composition of the respondent's network
- 1987 **Social Inequality**
 Opinions and attitudes towards inequality in the realm of "rich and poor" as well as "privileged and underprivileged."
- 1988 **Family and Changing Sex Roles**
 Attitudes concerning women as part of the labour force and possible conflicts with traditional sex roles
- 1989 **Work Orientations**
 General attitudes to work and leisure, work organisation, and work content
- 1990 **Role of Government II**
 Replication of the main topics of Role of Government I (1985)
- 1991 **Religion**
 Attitudes toward traditional religious beliefs and topics now connected with clerical social ideologies.
- 1992 **Inequality II**
 Replication of Inequality I (1987)
- 1993 **Environment**
 Attitudes to the environment, nature, pollution.
- 1994 **Family and Changing Gender Roles II**
 Replication of the main topics of Family and Changing Sex Roles I (1988)
- 1995 **National Identity (still to be drafted)**
- 1996 **Role of Government III**
 Replication of Role of Government II (1990)

How to get ISSP Data Files

You can order all listed ISSP Data Files (see p. 15-17) via your national data archive. However, Rolf Uher and his colleagues at the Zentralarchiv in Cologne, which serves as the ISSP Archive, will try to help with any enquiries you have. You can contact Rolf Uher

by mail: Bachemer Str. 40, 5000 Köln 41
by phone: (0221) 47694-25
by fax: (0221) 47694-44
by Bitnet/Earn: AHZ03 at IBMVM.RRZ.UNI-KOELN.DE

The ISSP secretariat is the address to contact with enquiries concerning the organisation of the ISSP. It can also help you contact the national conveyers.

The Secretary is Peter Ph. Mohler. Secretariat matters can be addressed to him or Janet Harkness.

by mail: B 2, 1, 6800 Mannheim, P.O.B. 12 21 55
by phone: (0621) 18004-42
by fax: (0621) 18004-49
by Bitnet/Earn: O05 at DHDURZ2
